Maps, search, routes and voice
Phone site + voice: working

### ADDITIONAL CHECK: API HEALTH

/api/health - HTTP 200

```
{
  "status": "ok",
  "app": "GeoVoice",
  "routingMode": "driving"
}
```

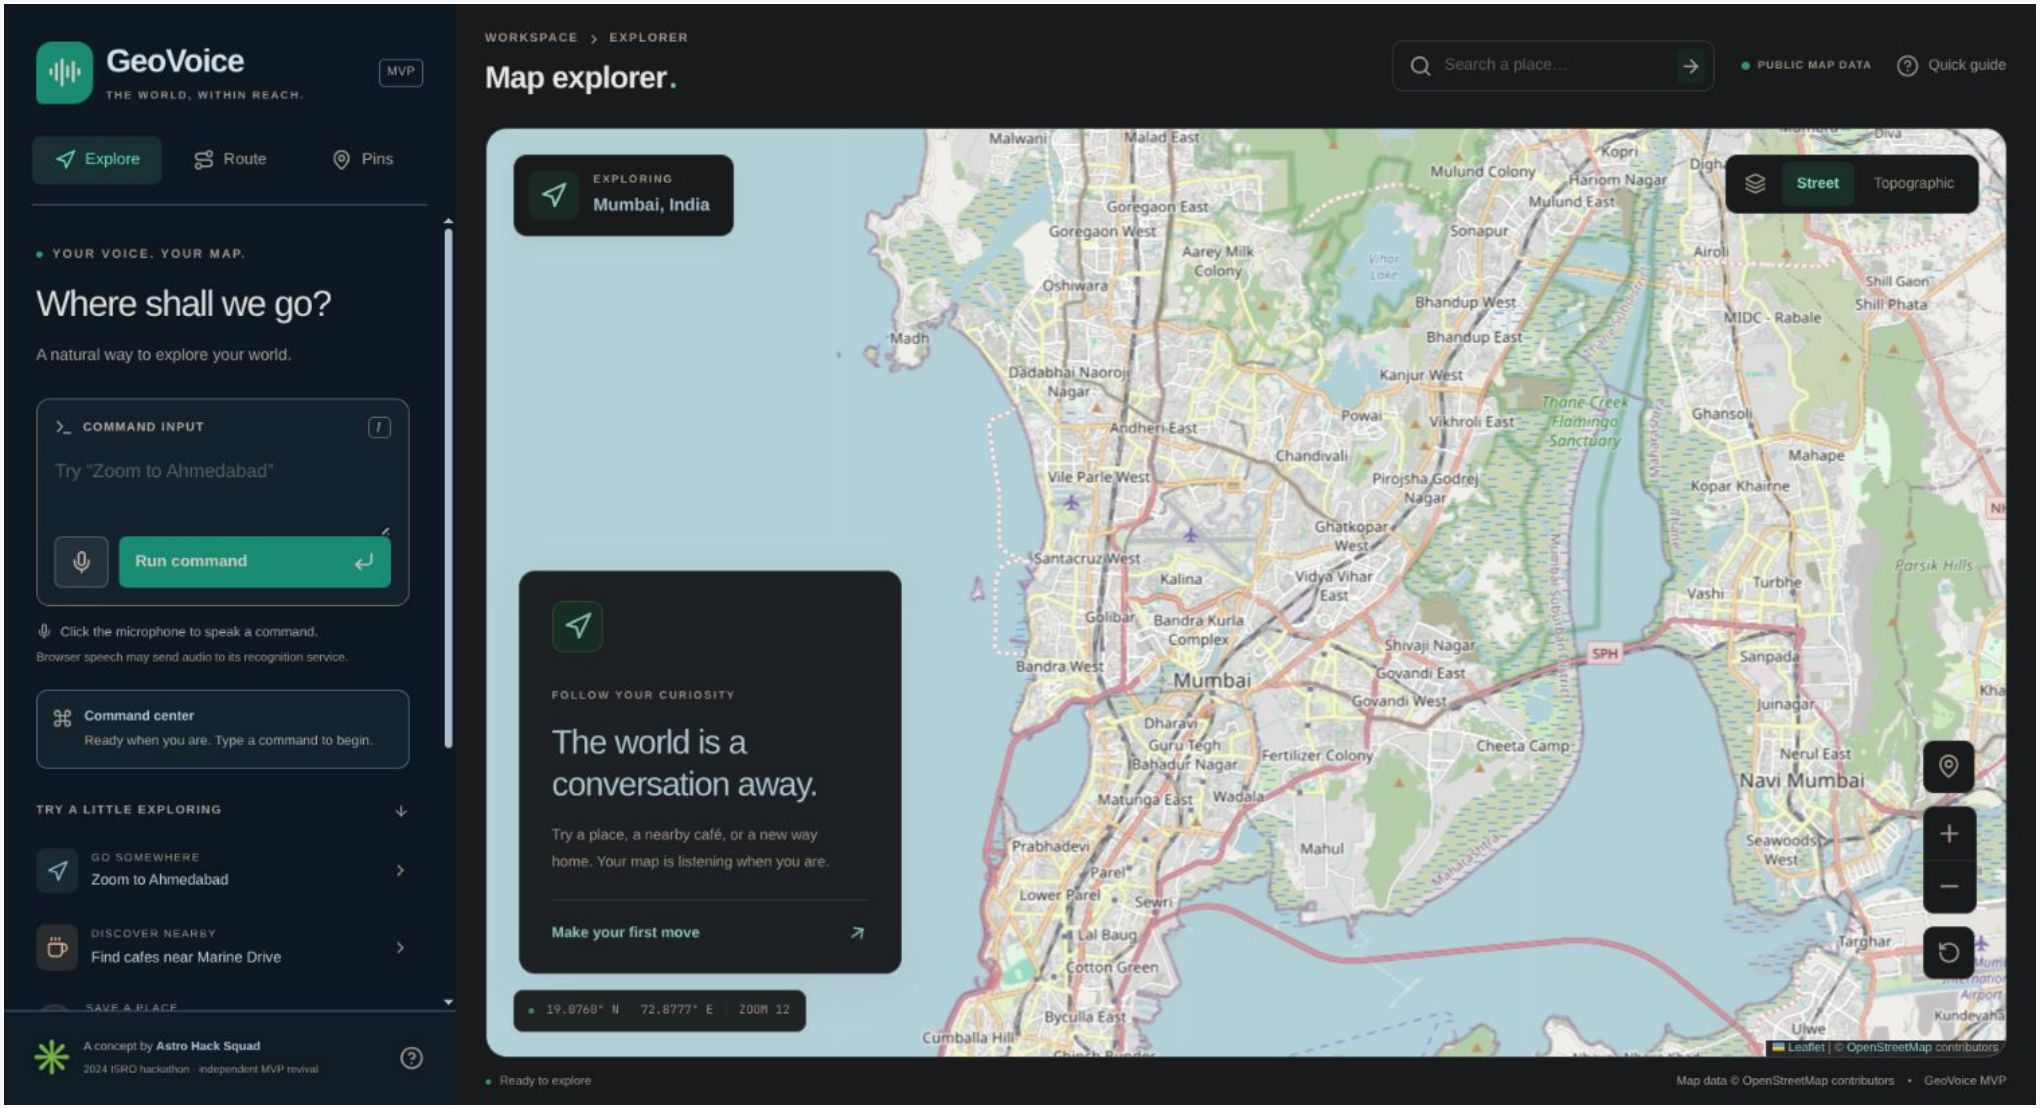

Backend is healthy.

The live site and voice commands work on mobile.

Nearby cafes use Photon fallback when Overpass is unavailable. Routes use OSRM driving directions.

# The deployed desktop map

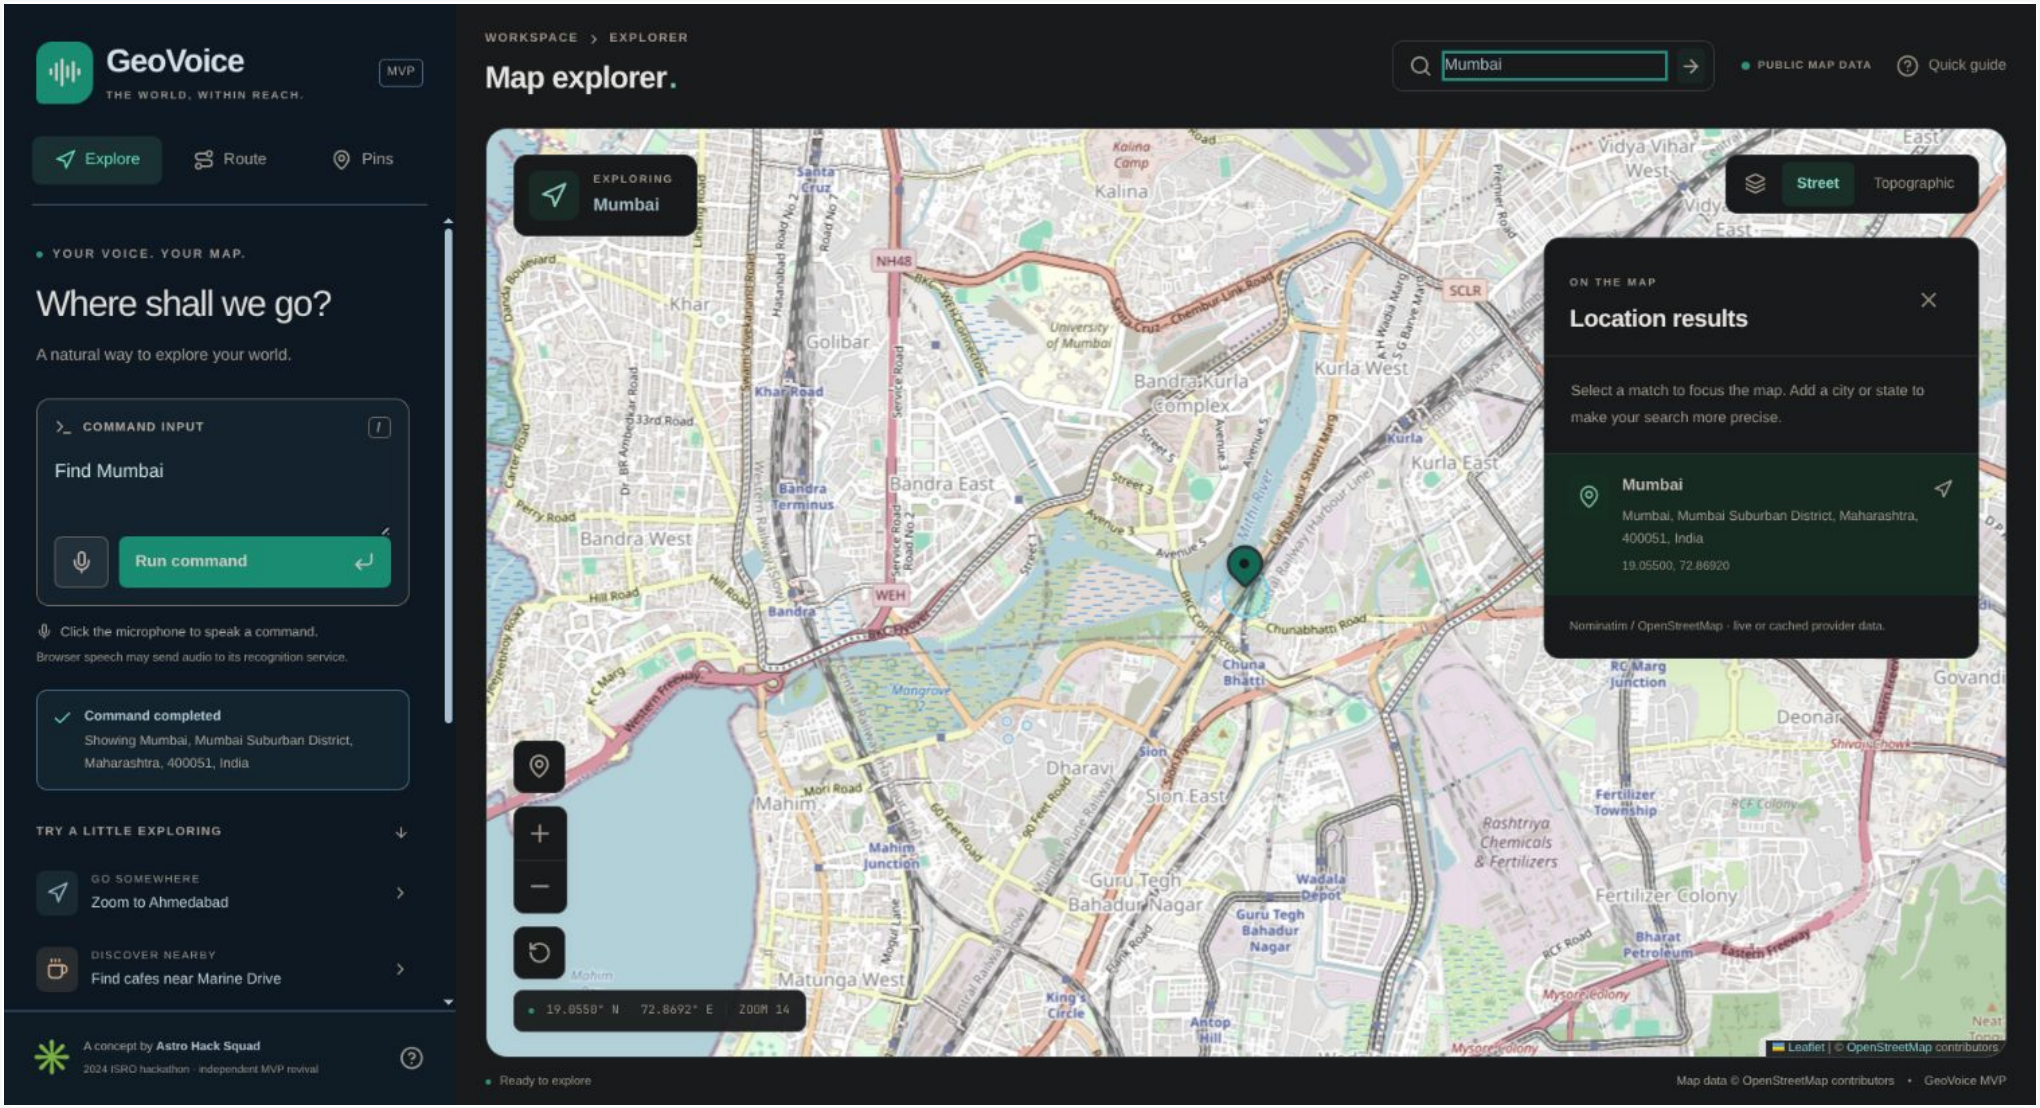

Explore Mumbai with an interactive street map.

Mumbai street tiles rendered correctly. Twelve sampled OpenStreetMap tile images were complete and had a natural width of 256 pixels.

# Mumbai location search

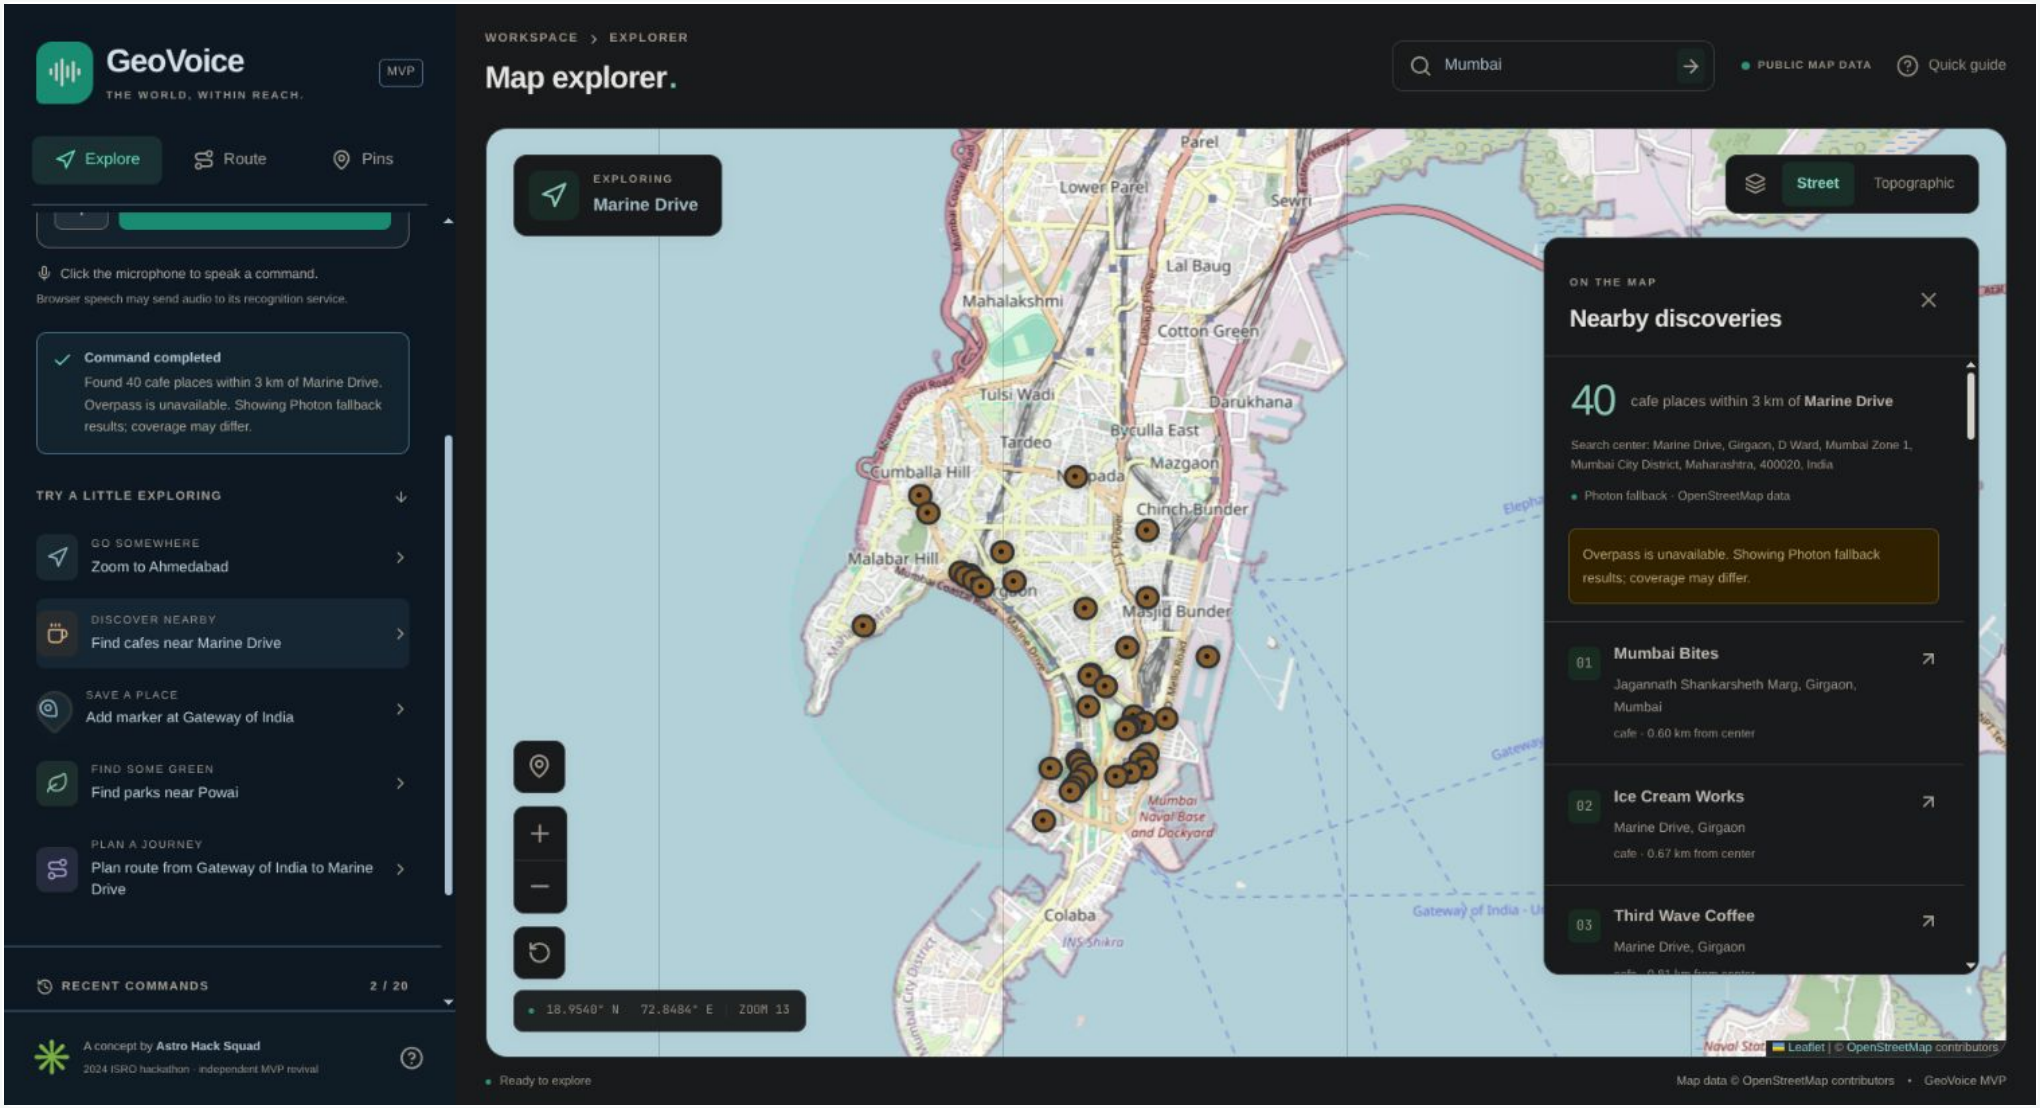

Search a location: Mumbai

The map moved to the resolved Mumbai result at 19.05500, 72.86920, zoom 14. The app identified the source as Nominatim / OpenStreetMap, live or cached provider data.

# Nearby cafes - fallback working

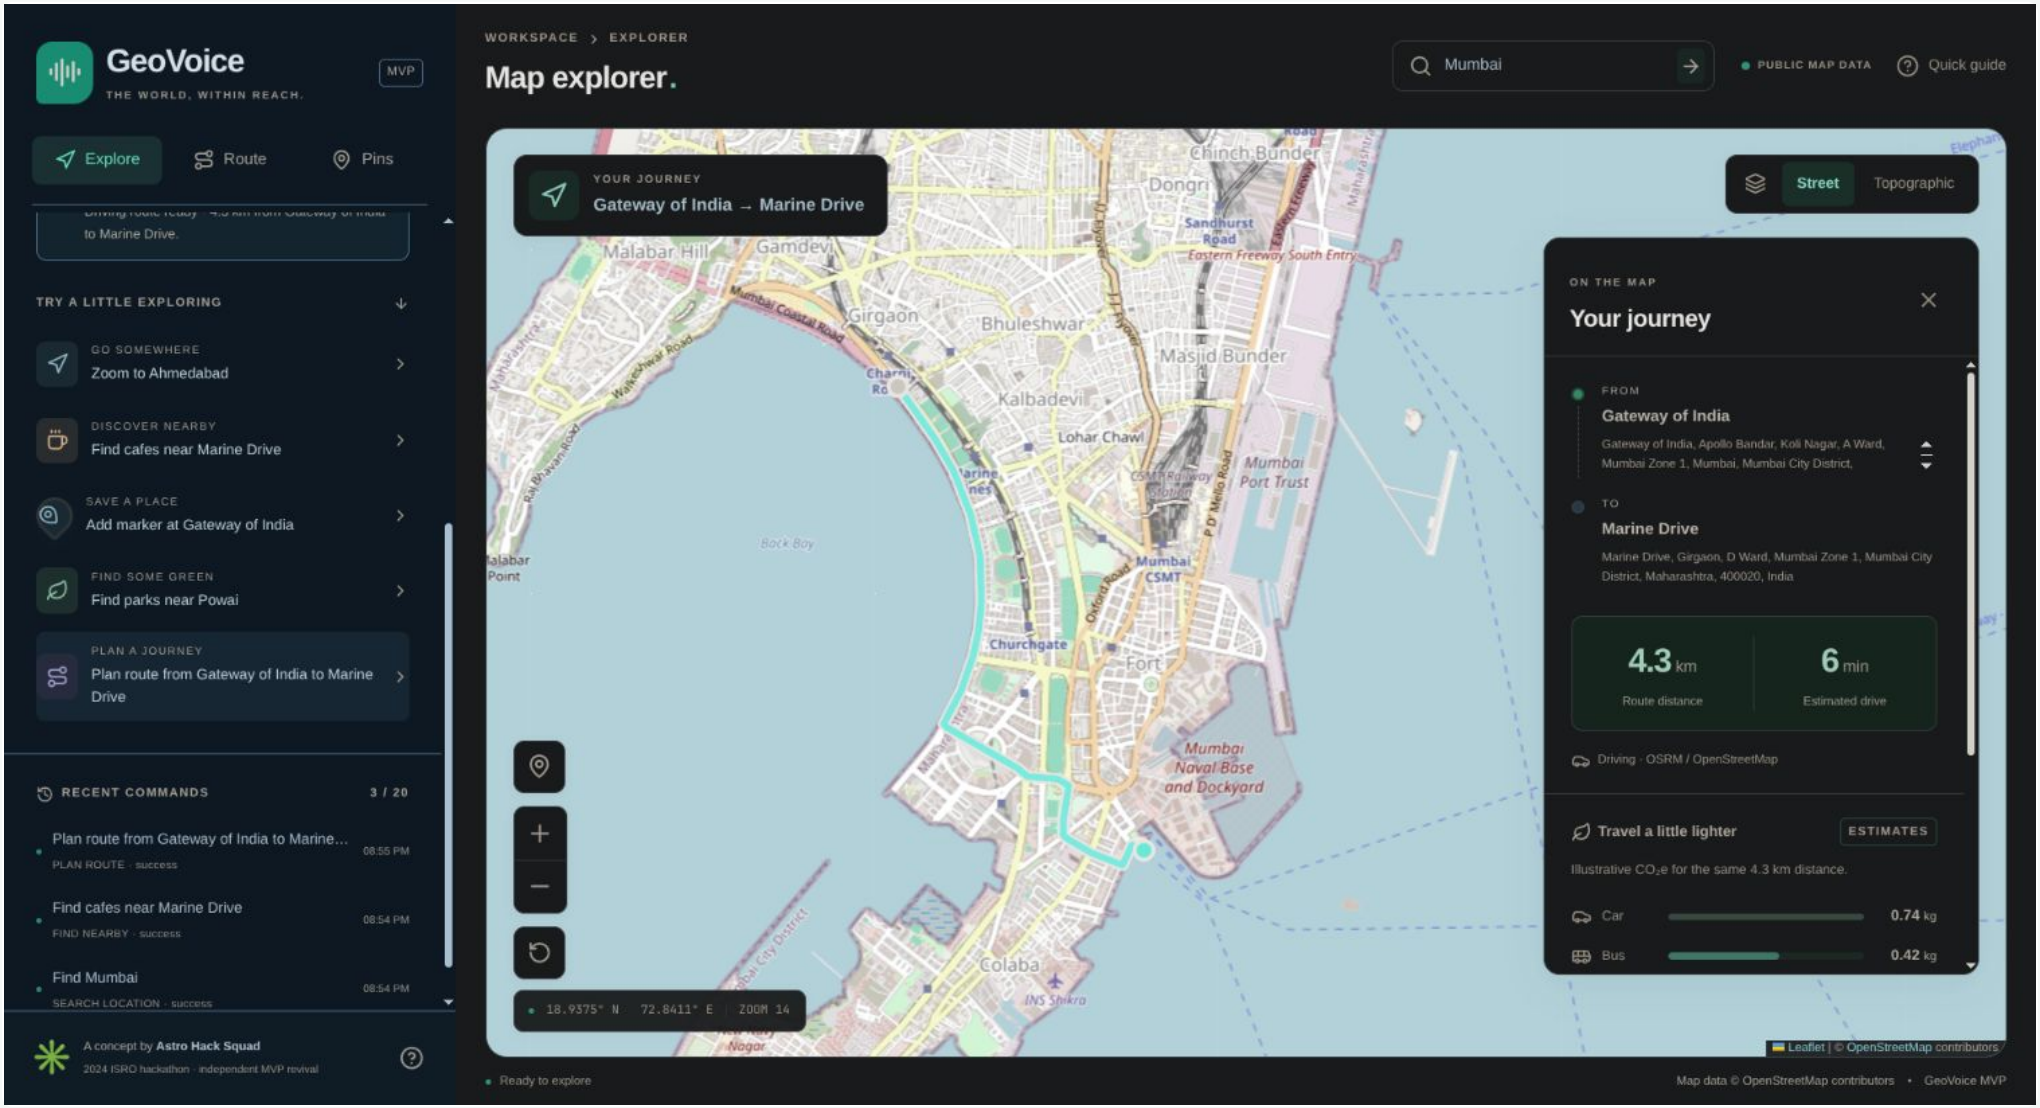

Command: Find cafes near Marine Drive

The app returned 40 cafe records within 3 km. Overpass was unavailable; Photon fallback and its differing coverage were explicitly disclosed.

# A completed driving route

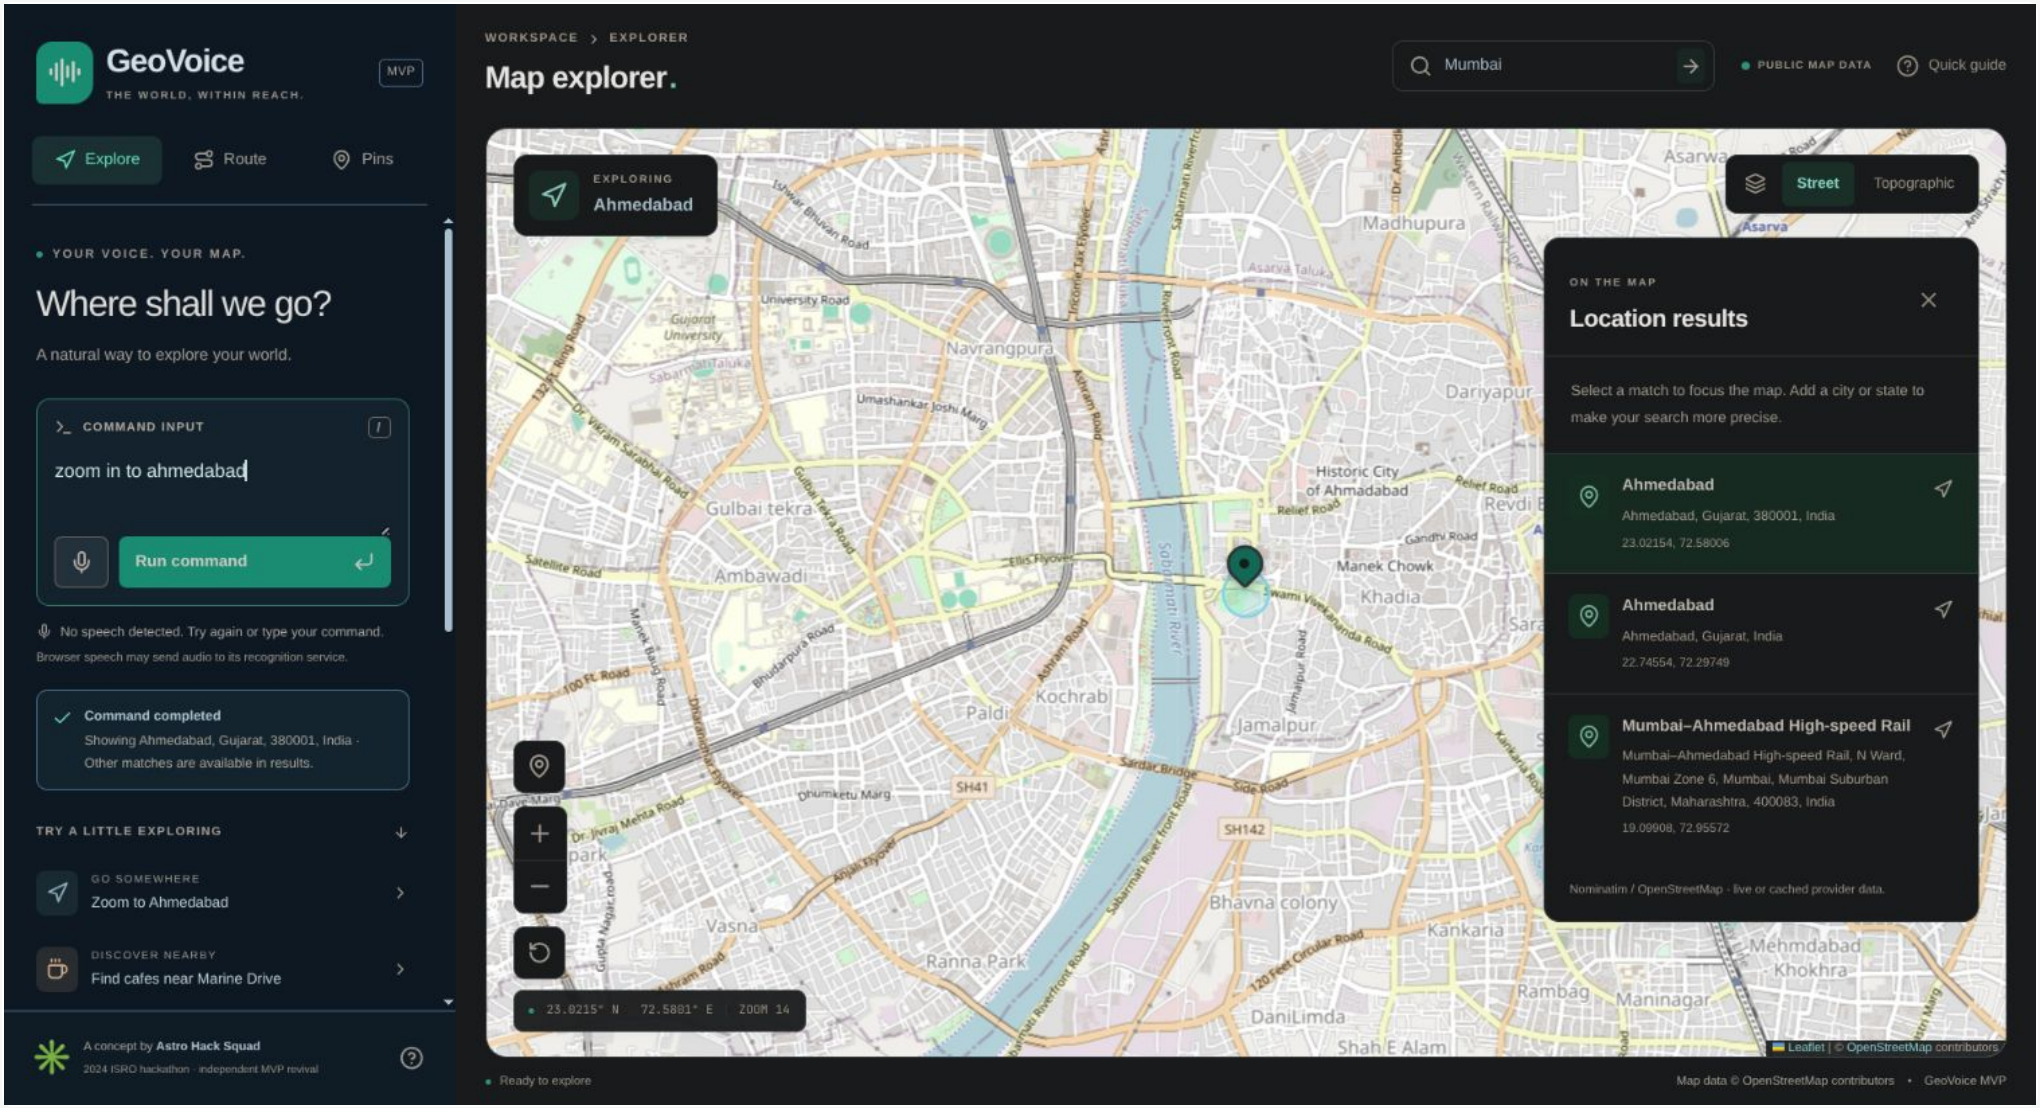

Gateway of India to Marine Drive

The OSRM driving route was drawn on the map: 4.3 km and an estimated 6 minutes. Carbon comparisons are illustrative.

# The original text phrase now executes

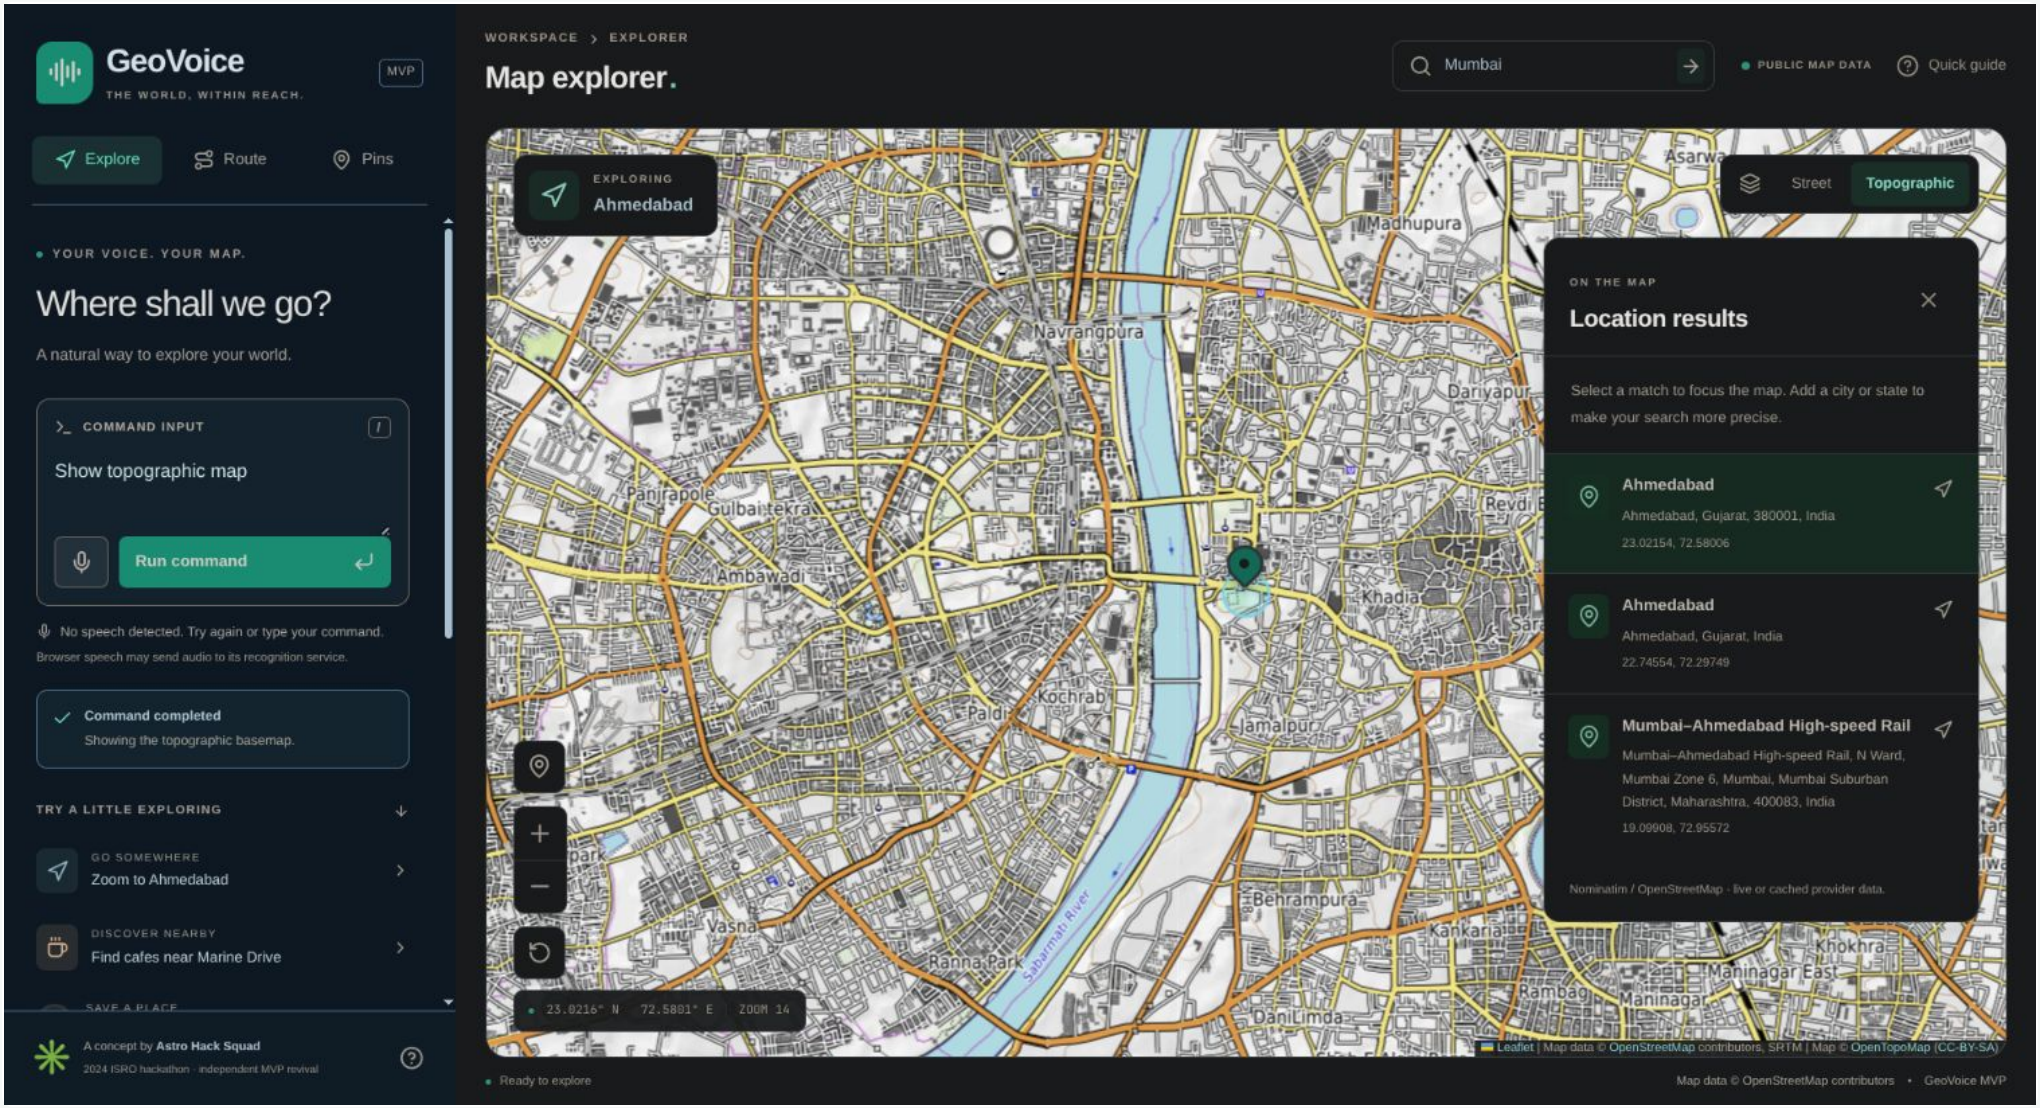

Command: zoom in to ahmedabad

The command completed with an Ahmedabad result and map movement to approximately 23.0215 N, 72.5800 E, zoom 14. It was submitted through the mobile command drawer.

# Topographic tiles also render

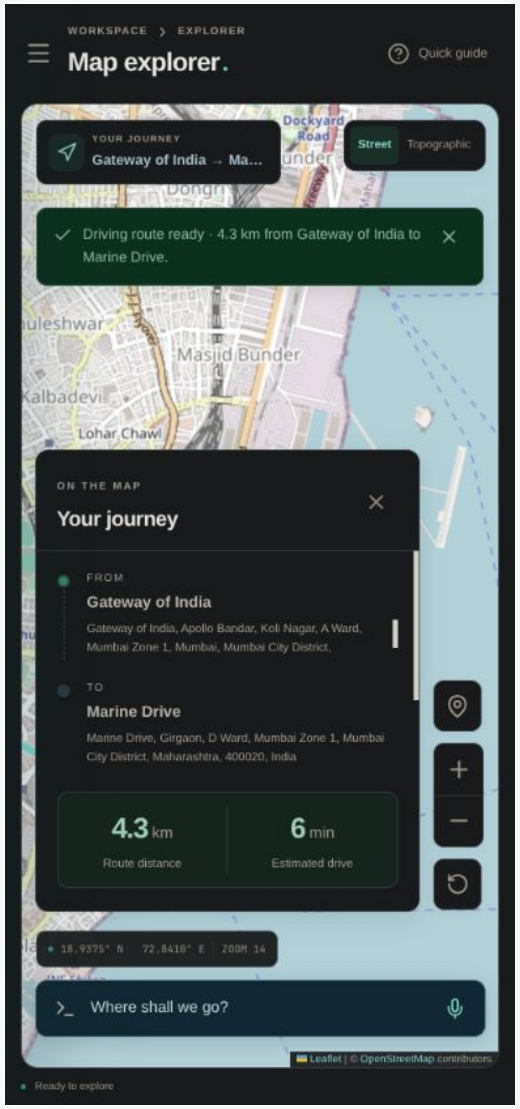

Existing map layer switch: Topographic

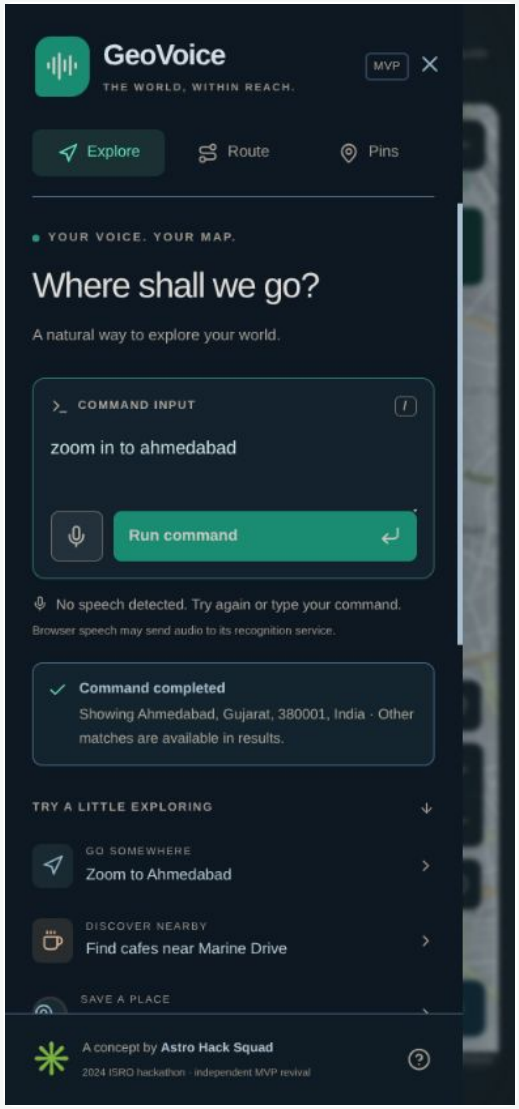

The selected OpenTopoMap layer rendered successfully. All 24 tile images present in the observed layer were complete and had a natural width of 256 pixels.

# Mobile layout

Responsive layout at 390 x 844, with no horizontal overflow.

Route sheet and map controls

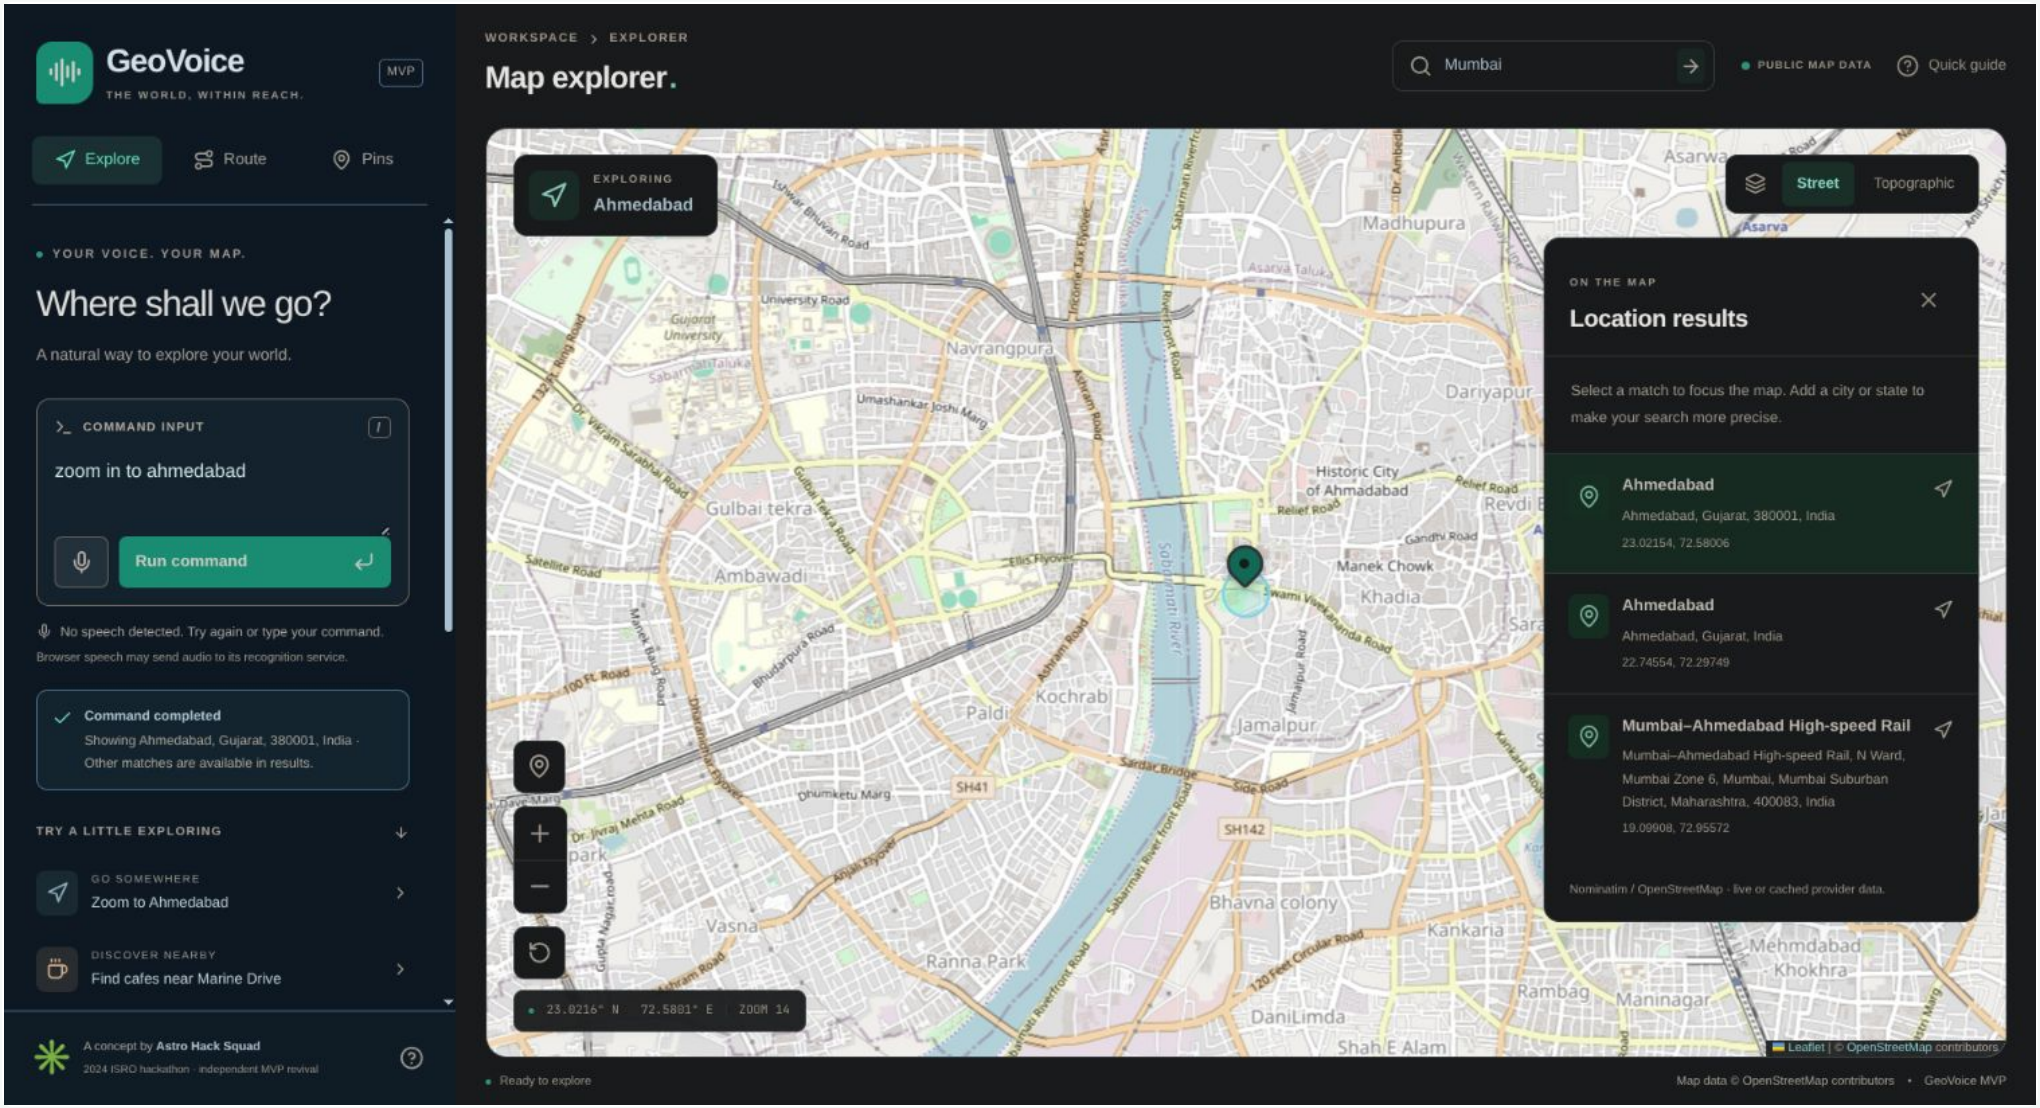

Command drawer and typed input

The site and voice commands work on mobile.

# Phone site and voice commands: working

Voice commands and typed input in one place.

The live site and voice commands work on mobile. The command panel supports both speech and typed input.
